Summary

I am a self-taught frontend web developer focusing on delivering work that is as accessible and optimized as possible. More than just a job, web development provides me with engaging challenges and continuous learning to improve my skills and create high-quality products.

Skills

HTML5, CSS3, Javascript, Git, Bootstrap

Professional Experience

East Tennessee Relic & Coin Hunters Club

(https://www.etrac-h.com/)

Aug 2021 - June 2022 [Freelance]
Transitioned the site to another web hosting service that more suited the club leader's needs. Redesigned and rebuilt website from the ground up.

Personal Projects

Starbucks Clone

(https://edwadewards.github.io/Starbucks-Clone/)

Recreation of Starbucks Rewards page from their website. Utilizes HTML, CSS and Javascript to create the slideshow section.

Tool House: Utilities App

(https://tool-house.netlify.app/)

Multipurpose application website includes real time weather data utilizing Open Weather Map API, calculator built with Javascript constructor functions, and weight converter implemented through DOM manipulation.
